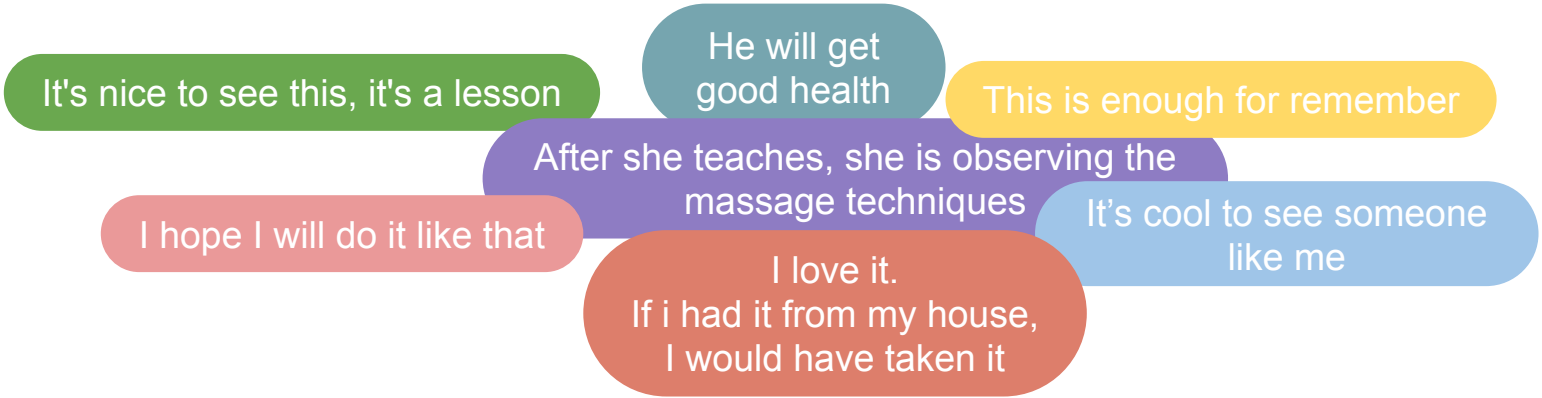
End Goal



It's nice to see this, it's a lesson
He will get good health
This is enough for remember
After she teaches, she is observing the massage techniques
I hope I will do it like that
It’s cool to see someone like me
I love it.
If i had it from my house, I would have taken it

LKN foundation

What do you teach and do now, and how?
What kind of training tools do you imagine for the future?

- What format are your current training tools?
  - Written instructions? Posters?
  - Videos? Live demonstrations?
  - Practice on each other? Supervise patient and caregiver practice?
- Do you provide printed material to patients and families?
  - Written or visual instructions on daily hygiene? Treatment of acute attacks?
  - Self-care diary or monitoring chart?
- What kind of resources would you need to add the enhanced care videos into their current program.
  - Get creative!
  - Imagine the next decade when device ownership and access has increased even further….
